Hung Luu

Tech guy with passion for Startups | CTO | Growth Hacker | Scrum
Master | Cloud | DevOps Architect
Ho Chi Minh City, Vietnam

Summary

Critical thinking, independent decision-making and lifelong learning enable me to drive projects forward. Working independently and as a team are what I am looking for to create meaningful solutions that not only positively impact the business but also the life of our customers.

I graduated with Master's Degree in Computer Science from Aalto University. Professionally, I have worked in startups, IT operations management and Big Data researching. My main interests revolve around new technology, disruptive ideas, psychology and entrepreneurship.

Currently, doing my day job and building up our soon-to-be unicorn at night and it is gonna BE awesome!

“Stay hungry, stay foolish.”

Experience

EPAM Systems

Consultant

August 2023 - Present (3 years 2 months)

Antler

Entrepreneur in Residence

April 2023 - July 2023 (4 months)

Ho Chi Minh City Metropolitan Area

Antler is a global early-stage venture capital firm that invests in the defining technology companies of tomorrow.

Pricey

Co-Founder

April 2023 - July 2023 (4 months)

Ho Chi Minh City Metropolitan Area

Pricey is an AI-powered end-to-end pricing intelligence service that helps SaaS companies price their products.

AI pricing and business model recommendations based on your company objectives, competitor insights, and go-to-market pricing.

Pricey provides a holistic solution to pricing, i.e. from pricing estimation, assessment to deployment and prediction, automatically without and/or limited human touch.

BanhDa

Co-Founder, CTO

December 2022 - May 2023 (6 months)

Melbourne, Victoria, Australia

Introducing BánhĐa, a startup that aims to revolutionize the food industry by helping sustainable restaurants, cafes, and grocery stores to connect with consumers who appreciate affordable, high-quality food, while reducing food waste. Our proprietary location-based mobile and web service enables consumers to find and rescue surplus food in their proximity, which can help food vendors save money and reduce food waste.

But our mission goes beyond just connecting vendors and consumers.

We want to create a platform that addresses the issue of food insecurity in Southeast Asia. Our platform allows food vendors to sell their surplus, wrong order or nearly expired dishes to those in need, such as blue-collar workers, students, and low-income families.

Did you know that 1,300,000,000 tons of food are wasted every year? By using BánhĐa, food vendors can reduce their waste, and consumers can get affordable, high-quality food while helping to reduce food waste. We believe that everyone should have access to good food, and we are determined to make that a reality. Join us in our mission to reduce food waste, fight hunger, and create a sustainable food system.

Nets Group

Senior DevOps Engineer

May 2022 - November 2022 (7 months)

Helsinki Metropolitan Area

- Consult, develop and support teams to migrate their services to the cloud, i.e., AWS and Azure
